

# *Old Country Stone*

*Where function meets style*

**ABBOTSFORD**  
CONCRETE PRODUCTS

*Today's technology can transport European charm of the past right to your doorstep. Old Country Stone is a tumbled product that gives the aesthetics of a hand-hewn stone with the convenience and practicality of a paver.*

*Our Paver Lights can be integrated into any project to create a dramatic and functional design.*

## How to get a professional look.

1. Compact and level the sub-base.
2. Backfill with 4" to 10" (100-250mm) of 3/4" minus road mulch or equivalent compacted granular fill.
3. Spread 1" (25mm) of concrete sand over fill. Avoid walking on the prepared base as this may cause the finished surface to be uneven.
4. Place Old Country Stone pavers in the desired pattern close together. The spacing should be consistent to help maintain a uniform pattern. Pavers can be cut to fit with a paver cutter or masonry saw.
5. Compact pavers with a mechanical plate compactor until level and firmly in place.
6. Fill joints completely by sweeping Abbotsford Concrete's joint sand across the surface, then compacting until joints are completely filled. The area is now ready for immediate use.

### Specifications:

#### ABBOTSFORD CONCRETE PRODUCTS

Pavers are manufactured to ASTM C 936 and CSA A231.2-14 specifications.

HydraPressed Slabs to CSA A231.1-14 and ASTM C1782/C1782M-16 specifications.

**Concrete strength:** 8000 PSI (55 MPA)
