KEY FACTS

- » High compressive strength
- » Flexible and resistant to cracking
- » Harmless to flora and fauna
- » Meet SLW60 loading category (vehicle up to 60 tonnes gross weight)
- » Complies with HSE manual handling limits

Permeable design
A rigid but open cellular design allows the grids to provide both exceptional support and water management.

Lightweight
Complies with HSE manual handling guidelines.

Flexible
Polymer construction is semi flexible and resistant to cracking unlike concrete.

High load
Meets high SLW vehicle usage specifications, up to 60 tonnes-DIN 1072.

Environmentally friendly
Manufactured from 100% recycled plastic.

Stable
Location fit connection improves stability once units are in position.

Application options
Open cells can be filled with either gravel or soil and seed depending on your application.
