An opportunity was presented in 2018, to build a new company that would provide a fresh outlook in the manufacturing of hardscape products. A team of very experienced industry individuals was assembled, and the Newstone Group was formed.

The goal of Newstone was to build a state-of-the-art manufacturing plant that could provide the highest quality products in the marketplace. The new facility, located in Delta, BC, can not only manufacture top quality classic products but can also provide innovative products and trends for years to come. This combined with our teams commitment to quality and customer service makes Newstone the right choice.

Newstone is 100% locally owned and operated and committed to the best environmental practices in all aspects of our manufacturing and operations. All products we produce meet or exceed standards set by both CSA and ASTM. We look forward to assisting you with all your hardscape projects.

*Keith Leach*  
President, Newstone Group

# Coastal Slate

Intended to be installed in a truly random pattern this concrete paving stone features the texture of natural sandstone.

## RECOMMENDED APPLICATIONS

Pedestrian

Walkways

Residential Driveway/Parking

When installing pavers with raised surfaces it is strongly recommended to use a compactor with a rubber pad to prevent burnishing the raised surface.

Please note, the lack of a chamfer requires installers to handle Urban pavers with more care than typical pavers.

Colours in photographs are not exact representations, but are given to provide close reference. Measurements and product dimension are nominal.

# Village Series

Irregular, slightly broken edges and corners create the effect of old European charm.

# Frequently Asked Questions

## WHERE CAN I PURCHASE NEWSTONE GROUP PAVERS AND SLABS?

As the manufacturer we produce the pavers and slabs, we distribute our products through our Dealer Partners. They are listed on our web site [www.newstonegroup.ca](http://www.newstonegroup.ca)

## WHERE CAN I USE INTERLOCKING CONCRETE PAVERS (PAVERS)?

Pavers are designed for use on everything from patios to roads. The only difference is the thickness and aspect ratio of the paver to be used.

## WHERE CAN I USE VIBROPRESSED SLABS (SLABS)?

Slabs are typically designed for use in non-vehicular areas such as patios, walkways, or plazas. They are installed on an aggregate base or on pedestals depending on the application.

## HOW DO I FIND A CONTRACTOR?

There are many qualified Contractors available in our region, typically a good resource for recommending the right Contractor(s) is the local Dealer. They will be able to match up your project with the right Contractor based on scope and timing.

## SHOULD I INSTALL PAVERS FROM DIFFERENT PALLETS OR ONE PALLET AT A TIME?

Always install from a minimum of 3 to 5 pallets to achieve the best differentiation in color and tone as pavers regardless of if they are monotone or blends can vary in shading and texture.

## WHAT IS THE WHITE RESIDUE ON MY PAVERS?

It is called Efflorescence; it is a whitish powder like deposit that sometimes appears on concrete or clay products. Efflorescence will usually wash and wear off over time. The recommended procedure is to allow this natural process to take place. However, efflorescence can be removed with commercially available cleaners. *CSA A231.1 Annex A*

## SHOULD I SEAL MY PAVERS OR SLABS?

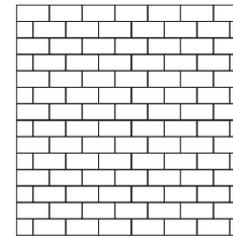

Sealing is recommended as it helps to protect the surface of the pavers from stains caused by organic material, foods and condiments, or vehicles. Two of the larger sealer manufacturers are Techniseal [www.techniseal.com](http://www.techniseal.com) and Alliance Gator [www.alliancegator.com](http://www.alliancegator.com) Both have good technical information and installation videos.

## HOW DO I PREVENT WEEDS?

Weeds occur when there are seed pods blown in from adjacent properties that fall into the joints and germinate. Polymeric sand is recommended as a best practice tool as Polymeric sand is designed to resist seed pods and complete through compaction a superior interlock. When installing Polymeric sand please read and follow the manufacturer's instructions, this will aid you in accomplishing a successful install and avoiding Polymeric sand haze.

## IS THERE AN INDUSTRY ASSOCIATION?

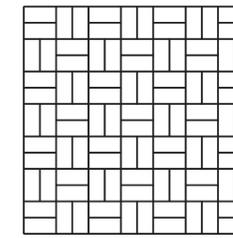

The Interlocking Concrete Pavement Institute (ICPI) [www.icpi.org](http://www.icpi.org) is the trade association representing the segmental concrete pavement industry in Canada and the United States. Excellent resource for technical specifications and education.
